Fundamentals of vPSI: Applying vPSI Methods of Problem Solving & Accident Prevention

Objectives

Upon completion of this one-day workshop, participants will be able to:

- Understand why problems and accidents repeat;
- Investigate problems, accidents, incidents, and near-misses in less time;
- Separate corrective actions that work from those that only look or sound good;
- Quickly produce effective corrective actions that maximize the probability of long-term performance improvement;
- Reduce costs by eliminating activities that are not real corrective actions;
- Solve all types of work problems more effectively;
- Improve the pre-job safety analysis process;
- Be familiar with the basics of the KUBO-TEPA™ method and the vPSI Test™.

Who Should Attend

Personnel at all levels of the organization will benefit from this training. Attendees should include Managers, Supervisors, HSE personnel and anyone who reports or investigates unplanned events such as Accidents, Incidents and Near Misses, develops or implements corrective actions, or takes part in pre-job planning.

Prerequisite

None.

Customization

This course can be customized with clients' own material for in-house training.

Cost

Maximum 12 trainees per class. Call or email for pricing.
